

GUIA PARA CALCULAR EL VALOR DE LAS EXTRAS

Usted puede realizar un formulario con visual basic , para calcular el valor de las horas extras

The screenshot shows a window titled "UserForm1" with a dark purple background. At the top, there is a table with four columns: "Sbasico", "NHE", "Factor", and "Valor". Each column has a corresponding input field below it. The "Factor" field is a dropdown menu. Below the table, there are three buttons: "Ejecutar", "Limpiar", and "salir".

Usted ve el botón y encontrara el código de programación que lleva cada botón

A close-up of the "Sbasico" input field, which is a simple text box.

```
Sheets("hoja2").Select  
Range("a2").Select  
ActiveCell.FormulaR1C1 = a
```

A close-up of the "NHE" input field, which is a simple text box.

```
Sheets("hoja2").Select  
Range("b2").Select  
ActiveCell.FormulaR1C1 = b
```

A close-up of the "Factor" dropdown menu, showing a list box with a downward arrow.

```
Sheets("hoja2").Select  
Range("c2").Select  
ActiveCell.FormulaR1C1 = ComboBox1
```

A close-up of the "Valor" input field, which is a simple text box.

```
Sheets("hoja2").Select  
Range("d2").Select  
ActiveCell.FormulaR1C1 = c
```

Ejecutar

‘En este botón encontrara el funcionamiento de la estructura case

```
Private Sub btnejecutar_Click()  
    Select Case ComboBox1  
        Case "HED"  
            c = Val(a) / 240 * b * 1.25  
        Case "HEN"  
            c = Val(a) / 240 * b * 1.75  
        Case "HER"  
            c = Val(a) / 240 * b * 0.35  
        Case "HEF"  
            c = Val(a) / 240 * b * 2  
        Case "HEFD"  
            c = Val(a) / 240 * b * 2.25  
        Case "HEFN"  
            c = Val(a) / 240 * b * 2.75  
        Case Else  
            c = 0  
    End Select  
    Sheets("hoja2").Select  
    Selection.EntireRow.Insert  
End Sub
```

Limpiar

```
Private Sub btnlimpiar_Click()  
    a = Empty  
    b = Empty  
    c = Empty  
    ComboBox1 = Empty  
    a.SetFocus  
End Sub
```

salir

```
Private Sub btnsalir_Click()  
    Me.Hide  
End Sub
```

El código de programación del combobox1
Es necesario del siguiente procedimiento

```
Private Sub UserForm_Initialize()  
    For h = 1 To 7  
        If h = 1 Then  
            hora = "HED"  
        End If
```

```
    If h = 2 Then
    hora = "HEN"
    End If
    If h = 3 Then
    hora = "HER"
    End If
    If h = 4 Then
    hora = "HEF"
    End If
    If h = 5 Then
    hora = "HEFD"
    End If
    If h = 6 Then
    hora = "HEFN"
    End If
    If h = 7 Then
    hora = "HERF"
    End If
    ComboBox1.AddItem (hora)
  Next
End Sub
```
